DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington,* 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4, 6-8, 11-30 are rejected under the judicially created doctrine of double patenting over claim1-15 of U. S. Patent No. 6,728,721 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter,

as follows: a method for delivering batches of data to a client, while maintaining a user's state within a database table.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Allowable Subject Matter

1. Claims 1-4, 6-8, 11-30 are allowed over the prior art of record.

The prior art of record fails to teach or suggest individually or in combination **determining whether the request for the second batch of records was for the next batch of data, or for a previous batch of data from the database table, wherein the request for the second batch of records specifies a value for the at least one field that has a specific relationship relative to one of the minimum and the maximum value for the at least one field in the first batch of records, to indicate whether the request is for the next batch of data or for the previous batch of data, and in response to a determination that the request for the second batch of records was for the previous batch of data based on the value specified in the request for the second batch of records being less than the minimum value for said at least one field in the first batch of records** as set forth in independent claims 1, 8, 15, 18, 23, and 28.

Dependent claims 2-7, 11-14, 16, 17, 19-22, 24-27, 29, and 30 being further limiting to the independent claims 1, 8, 15, 18, 23, and 28 respectively, definite and enable by the Specification are also allowed.

The closet prior art, **Bredenberg** US Patent No. 5,826,253 teaches a method for notifying clients of modification occurring at the database server which affect validity of a range of data records cached in local memory buffers of clients. The closest prior art fails to anticipate or render Applicant's limitations above obvious.
